Suspension gel formulation technology

Reserve

People use health care products can really improve their health? Of course, people began to wish everyone good: eat health pills, a cup of juice on it, but soon became troublesome and glass tablet is not good carry.

Want to try a new approach to health care? Want to know a new way of conveying the nutrition market? Triathlon athletes and marathon runners often eat several small packets of gelatin in order to promptly broke out in a lot of energy. Why not take nutritious food usually take the same way?

Of course! First introduced Jeunesse™ with you through the advanced patented technology, which is also associated with other health food production enterprises in different ways, usually we eat pills for thousands of years, many formulations style, each year, number of stars swallow pills, even after

You changed into a powder body, eat the pills or powders when Shiyou must drink plenty of water body in order to cooperate on water use, and eventually wait for hours for the stomach to digest, but the decomposition of several stomach Weisuan faster than water, so raising copies will be quickly lost, the proportion of truly limited absorption. The food like fruit juice, nutrient deposition has put the problem a long time, when youDrink drink to hydrate the surface, not even shaking off nutrients, the effect is limited. Advanced suspension gel technology is solve the above problems, Gu, "suspension" that is floating in the top of nutrients, Reserve™ nutrition alcohol product patents from natural resveratrol, Concord grapes, blueberries and other fruits and extracted from herbs mixed into a delicious nutrient gel, the time when drinking through the base of the tongue and throat below the rapid absorption of oral mucosa, and if sublingual medication, drug absorbed into the bloodstream via the oral mucosa, directly into the systemic circulation, can to avoid the first of the elimination of drugs. Through suspension gel technology can be one dayTransport of nutrients the body needs to any part of the body, fast and simple. Invite you to think about: In this way, we do not use glass, but also not big pills, not liquid scattered fruit juice, no bottles of no use - only a bag easy to carry, easy to absorb the flavor of the novel and the condensate plastic packaging, with concentrated nutrients. Reserve™ is the revolutionary vanguard of nutritional supplements - the use of extremely simple, extremely superior taste!
